Research title

A short name for the study, for example 'Usability testing of checkout flow'.

Jira Project

Jira ticket for the initiative this research supports.

Lead researcher

Name of the person leading this research.

Project requester

Name of the person requesting this work.

Project decision

Date of the decision informed by this research.

Research readout

Date findings are shared with the team.

Context

3 fields

Background

Relevant context and essential terms needed to understand the project.

Goal

The outcome you are trying to achieve, and the expected changes in the product.

Problem Statement

A concise summary of the specific issue, challenge, or gap that needs to be addressed.

Research

4 fields

Objective

The purpose of the study: what must be learned to guide product decisions.

Hypothesis (optional)

An educated assumption about this project's results, structured as: *If we do this, then this will happen.*

Research Questions

A question that outlines the topic you want to explore and points directly to what you aim to discover. Three is a good number for a balanced study.

1. How do returning customers use delivery information when deciding whether to complete checkout?

2.

3.

Which delivery details do customers need before they can confidently place their order?

An individual entry has a quality score of 1 of 3. Resolve critical entry weaknesses before this evaluation can be Good or Ready.

Research Question 1 — Clear

■ ■ ■ 3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Research Question 1 — Focused

■ □ □ 1 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Research Question 1 — Specific

■ ■ ■ 3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Research Question 3 — Clear

■ ■ ■ 3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Research Question 3 — Focused

3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Research Question 3 — Specific

3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Set quality — distinct coverage across the research questions

3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Recommendations

- [illegible]

Outcomes

A deliverable built from the findings of a research question, such as a list of issues or a journey map.

1. A prioritised report of checkout delivery-information barriers.
- 2.
3. An evidence-based comparison of delivery-information needs to guide the next design decision.

Outcomes Evaluation

Developing

An individual entry has a quality score of 1 of 3. Resolve critical entry weaknesses before this evaluation can be Good or Ready.

Outcome 1 — Actionable

■ ■ ■ 3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Outcome 1 — Format

■ □ □ 1 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Outcome 1 — Alignment

■ ■ ■ 3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Outcome 3 — Actionalble

3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context. Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Outcome 3 — Format

3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Outcome 3 — Alignment

3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Alignment — Outcome 3 ↔ Research Question 3

3 of 3

Explain which observed checkout behaviour supports this judgement and how it relates to the study population, decision and delivery context.

Recommendations

- [illegible]

Methodology

5 fields

Theory (optional)

A framework to help ground the study design and analysis.

Methods

A technique to study user behaviors, needs, and experiences that helps answer a research question.

RQ1 · Delivery information

1.

RQ2

1.

RQ3 · Delivery details

1.

Participants

Characteristics

The criteria that decide whether someone is eligible for this study. For example:
Abandoned a checkout in the last 30 days.

1.

User Groups

The segments that must be represented among the people you recruit. For example:
New customers.

1.

Sample Size

The number of participants needed for this study.

- ☐ Small (1–5)
- ☐ Medium (6–12)
- ☐ Large (13–29)
- ☐ Very Large (30+)
- ☐ Other

Execution

3 fields

Stage Timeline

The planned schedule for each stage of this research, from planning through reporting. Stages and dates are suggested defaults based on your plan details — feel free to adjust or remove them.

Stage	Start Date	Completion Date
Planning ▼	08 - Sep - 2026	DD - MM - YYYY
Recruitment ▼	DD - MM - YYYY	DD - MM - YYYY
Data Collection ▼	DD - MM - YYYY	DD - MM - YYYY
Analysis ▼	DD - MM - YYYY	DD - MM - YYYY
Reporting ▼	DD - MM - YYYY	DD - MM - YYYY

Add stages with start and completion dates to see a timeline.

Action Points (optional)

Tasks needed to move this research forward, and who owns each one.

Action	Responsible

Previous Knowledge (optional)

Prior research or documentation relevant to this study, attached for reference. For example: Q3 Checkout Usability Study.

Name	File
	No file chosen

Additional information

Anything this plan needs that the sections above have no place for. Each one you add becomes its own titled part of the document. To comment on the plan rather than add to it, use Feedback at the end.

Review

Check the plan is complete and current, then approve it.

• Context	1 of 3 fields	evaluated	Change
• Research	2 of 4 fields	evaluated	Change
• Methodology	0 of 5 fields		Change
• Execution	0 of 3 fields		Change

Sign off: Lead researcher

Lead researcher approval — type initials and the date is added automatically.

Sign off: Project requester

Project requester approval — type initials and the date is added automatically.

Feedback (optional)

Comments on the plan itself — a question, a concern, or anything you want the approvers to read before signing.

RPA-63 printable feedback: keep this review comment in the saved plan.
